# Commercial Lighting

Office environments are rapidly changing to keep pace with today's fast-moving workstyles. The need to accommodate this flexibility brings significant challenges to how commercial lighting is designed and managed.

MEGAMAN® Commercial Lighting is designed to satisfy the dynamic demands of modern offices enhancing the well-being and productivity of staff, reinforcing the corporate image and offering substantial savings in running costs.

# Vitality with Light

## Reception

It's always true that a reception area should convey a strong corporate personality and give visitors a positive impression. The right lighting plan is a prerequisite in creating a welcoming atmosphere and projecting the corporate image from a professional, modern, classic to a stylish way.

Accent lighting on feature walls and corporate logos makes for contrast and can better draw visitors' attention, while adequate task lighting provides sufficient illuminance for the receptionist.

MARCO

MONDENA

## **Corridors and Stairways**

Lighting in corridors and stairways helps people find their way to transit areas. Sufficient and uniform general illumination ensures safe orientation and provides a sense of safety. By installing smart lighting solutions can achieve significant energy saving by dimming corridor lights when no motion is detected.

SIENA

ZEKI

Open Plan Office
An adaptable working environment is important for an open plan office. The ambient lighting should give visual comfort and consistency for team communication while higher illuminance of task lighting is ideal for concentrated work at task location. It not only improves productivity, but enhances employee morale and reduces energy consumption by equipping them with a flexible lighting control.

## **Conference Rooms**

As a multi-functional meeting area, lighting flexibility is always critical to meet various activities' requirements from video conferences and presentations to brainstorming sessions. A combination of general lighting with high visual comfort, balanced and soft illuminance at the table for face-toface dialogue and dimmable light for presentation allows for dynamic use of space.

With the advanced features of smart lighting solution, users can have full control via smart device, of the ON/OFF, dimming and scene setting of environment.

#### **Breakout Areas**

Breakout areas provide a third space for employees to relax, socialise and share ideas. Warmer colour temperature and lower lighting levels helps create a cosy and comfortable environment, allowing them to recharge and take a refreshing break from work.

SIENA

Filament Lamp

### **Showroom**

Lighting is vital to a showroom that secures sales and delivers a brand identity. It helps to highlight special areas in the showroom, like your newest merchandise or your trending displays.

Diffused and uniform general lighting helps create an inviting atmosphere and makes customers stay longer. Accent lighting with high colour rendering index is always used to create contrast and visual impact on the forms, structures, textures and colour of the key objects.

## **Smart Lighting Solution**

As a lighting system expert, MEGAMAN® smart lighting solution allows users to enjoy a new level of control in terms of convenience, efficiency and security. It can be applied to any new construction or retrofit projects for home, offices, retail stores and other scalable spaces. It is an affordable and fast way to experience home automation.

MEGAMAN® GABIO LED pendant direct/indirect louvre brings suspended task lighting in a new direction by combining the minimalist design of louvres and the most advanced optical distribution within offices, classrooms, hotel reception and other commercial spaces.

- · Slim aluminium linear profile
- Louvre cell design with low glare rating (UGR≤19)
- · Wide batwing light distribution and wide beam angle
- Available in suspension, recessed and surface mounting methods

Designed for modern offices, schools and department stores, the MEGAMAN® ESTELA series is the ideal integrated LED louvre panel for general lighting purpose. Not only does it have a distinct appearance featuring flatness and robustness, but it also provides users with uniform illumination with visual comfort.

- Perfect replacement for T5 and T8 fluorescent louvre fitting
- Available in integrated switchable and DALI dimming options
- Mountable on both exposed T-bar and concealed T-bar ceilings
- Lightweight and simple dust-free design for easy maintenance
- Good cut off angle for visual comfort

**MEGAMAN® Perfect White** technology offers retailers a distinct advantage enhancing textiles by bringing whites to life while still offering superb efficacy and energy efficiency, compared to traditional light sources. It is ideally suited for retail lighting as well as other accent and display applications.

### RichColour

MEGAMAN® RichColour Series is designed to maximise the richness and quality of colours with high colour rendering of up to Ra97.

## SIENA FR

## **Recessed LED Downlight**

Compact in size and with an integrated driver, the MEGAMAN® SIENA FR is a range of integrated LED recessed downlights that facilitates easy installation. The SIENA FR range provides excellent uniform light distribution and delivers high system efficiency when compared to conventional downlights in which a substantial amount of light is lost in the system, making it an ideal general lighting solution to commercial installation.

- Range of sizes from 3", 4", 5", 6" and 8" diameter allowing retrofit replacement in existing ceiling cut-outs
- No external driver required which facilitates easy installation and maintenance
- Excellent colour rendering index of up to Ra92 with RichColour option
- U-DIM<sup>™</sup> option provides seamless and flicker-free dimming
- · Facet reflector enables even light distribution

## U-DIM™

Compatible with BOTH Leading-edge and Trailing-edge Conventional Dimmers for 100-5% Linear Dimming.

 $<sup>^{1}\,</sup>$  Capable of linear dimming from 100% to 5% when working with most conventional dimmers.

## RichColour

MEGAMAN® RichColour Series is designed to maximise the richness and quality of colours with high colour rendering of up to Ra97.

# Reflectors

As the retrofit replacement of halogen lamps, the MEGAMAN® LED Reflectors range has the same compact profile to halogen counterparts but offers significant energy saving. Available in various beam angle options, the MEGAMAN® LED Reflector complements your lighting fixtures to create uniform and glare-free light, making it ideal for general and spot lighting in commercial applications.

- Perfect replacement for traditional halogen MR16, PAR16 and AR111
- Multiple beam options from narrow to wide angles for various applications
- Excellent colour rendering index of up to Ra95 with RichColour option
- Hybrid Reflector offers precise beam control and efficacy
- U-DIM<sup>™</sup> option to provide seamless and flicker-free dimming
- Long rated life of up to 40,000 hours
