

LED MR11

The MEGAMAN® LED MR11 reflector is an ideal retrofit for halogen spot lighting, providing significant energy savings of 80% and less heat output. It offers a superb light output of 600cd with 4W power consumption replacing the 20W halogen MR11 to illuminate your product displays. The small profile LED MR11 with both Warm White and Cool White options available, is perfect for use in merchandise display areas.
